

TRAINING

# Shopping

The app store for the enterprise

## Implementing and using Shopping

This is an instructor-led course designed to equip technical people responsible for implementing Shopping into a customer environment with the required knowledge and basic experience. The course is conducted over 2 days covering concepts and architecture, along with plenty of hands-on exercises to get experience installing, configuring and using the core features of Shopping.

### Target audience

This course is suitable for:

- Technical staff responsible for the implementation of Shopping
- Technical staff who require a sound technical understanding of the features of Shopping

### Learning outcomes

This course aims to provide delegates with:

- An understanding of how Shopping reduces IT costs by empowering users to help themselves to software
- The ability to design and implement Shopping in common environments
- An understanding of how and when to use the core product features to meet specific customer requirements
- Hands-on experience installing and configuring Shopping to achieve self-service software and OS deployment

### Required knowledge and experience

Delegates attending this course are expected to be familiar with:

- Implementation and configuration of Microsoft Internet Information Server
- Implementation and configuration of Microsoft SQL Server
- Basic SQL database management using the SQL Server Management Studio
- Using Microsoft System Center Configuration Manager for Software Distribution and OS Deployment

### Course outline

The following topics are covered in this course:

- Understanding the problem
- Shopping Architecture
- Shopping Roles
- Installing and Configuring ActiveEfficiency (Lab)
- Installing Shopping (Lab)
- Working with Applications (with Lab)
- Application Approval (with Lab)
- Efficient use of Application Licenses (with Lab)
- Other uses for Applications (Lab)
- Delegated administration (with Lab)
- Self-service Windows 7 migration (with Lab)
- Reporting (Lab)
- Customizing Shopping (Lab)
